

GUJARAT TECHNOLOGICAL UNIVERSITY

Report on Online 3D Scanning Workshop

Date: 1st May 2020

Time: 5:00 PM to 6:15 PM

Registration Link: <http://bit.ly/DicGtuWorkshop>

Expert Name: Mr. Chetan Bhusari

3D Scanning Expert, LiDAR Engineer

No. of Registration: 281 **No. of Participants:** 95

Reverse Engineering is defined as the process of understanding the underlying design intent of a product. This could be achieved to realize various end results and applications. Purposes of reverse engineering could be to realize the geometry, process of assembly, process of manufacture, Materials used in the product. Our expert faculty defined all the terms and gave example to the all participants and also describe different types of 3D scanning process. Moreover, Applications of 3D Scanning is well described by Experts which is very useful for students and participants. In the end of workshop Mr. Chetan talked about job roll and career in 3D Scanning system and Technologies.
