## National Thermal Engineer's Day Celebration conducted on 24<sup>th</sup> July 2020

National Thermal Engineer Day is celebrated on July 24 to appreciate the contribution of thermal engineers in everyday life. Electronics thermal management is key for its longevity and reliable operations. But thermal engineers do not get recognition for their work. Either engineers work in consumer electronics, large data centers, or aerospace electronics or biomedical, they contribute to the core of technological development for the country. This development does not function without thermal engineers. On this Day DIC celebrate by organizing webinar on Advance Design on Turbo Charger Turbine. In this program Hon'ble Vice Chancellor Sir Prof. (Dr.) Navin Sheth Sir wished the all the Participants and talk about important of Thermal Engineers. The invited expert speaker Dr. Samip Shah Sir talked about various methods of improving Design of Turbo Charger Turbine with their Simulation data and also present practical done by him during his Research. Almost 5000 participants watched Thermal Day Celebration Video on Facebook page of GTU.
